WHY BELGARD ELEMENTS?

Elements give you the ability to create an outdoor living space that’s uniquely yours and to do so at your own pace – be it all at once, or in phases. Each of our distinct collections is comprised of multiple modular units, created to provide you with unlimited design options.
BELGARD® ELEMENTS COLLECTION™
DESIGNED FOR FAST & EASY INSTALL

INSTALLING BELGARD ELEMENTS TIPS:

TIP 1. Always place a piece of material, plywood or carpet work well-between your forks and the Elements to prevent chipping.

TIP 2. Always transport the Element on the pallet it comes with until you are ready to place on the permanent location.

TIP 3. Make sure to use a ratchet strap to secure the Element to the loader when transporting and placing.

TIP 4. Handle Elements with care - they are concrete, but not indestructible.

Make sure to size the machine to the Elements weight.

TIP 6. All Elements are designed to be buried 4" below finish grade.
Elements are delivered already assembled. All you need to do is create the proper base and place the units in the desired location. Follow the steps below and refer to our tips for a successful installation.

Always place a piece of material (plywood or carpet) between your forks and the Elements to prevent chipping. Be sure to review installation instructions for each Element.

Pour a level concrete pad to set the Element on. Check local ordinances to see if frost footings are required. (See page 28 for concrete pad installation)

Always transport the Element on the pallet it comes with until you are ready to place in the permanent location. Keep a ratchet strap around it until it’s set completely.

Place Element on concrete pad. Use plastic shims to adjust for pad imperfections if necessary and exercise caution when setting. Never place hands or feet between the Elements and the pad.

For two piece Elements such as fireplaces and brick ovens, make sure the top section is centered in both directions. It is not necessary to adhere pieces together unless there is a seismic requirement in your area.

Once Elements are set on pad, install all additional items such as flue pipes, termination caps, and stainless (i.e. grill and accessories). At this time also place all “plugs” into fork slots.
ELEMENTS ARE TO BE 4" BELOW FINISHED GRADE

1" OF TORPEDO SAND

LAY PAVERS UP NEXT TO ELEMENTS

CONCRETE PAD SHOULD BE 4 - 6" THICK

6" - 8" OF COMPACTED AND LEVEL GRAVEL BASE ALSO BELOW CONCRETE

COMPACTED SUB BASE (REMOVE TOP SOIL)

CONCRETE PYLONS DOWN BELOW FROST LINE WITH REBAR
For areas not affected by freeze-thaw conditions please contact your local Belgard sales representative for further installation information.
